EXPERIENCE

React Projects

Personal Portfolio: I have created my portfolio using React, Tailwindcss and Framer-Motion. I have used react-router to navigate between pages.

Live website: <https://bibekbista.netlify.app>

Rental House: Single page rental house frontend website using react, tailwindcss and Framer motion.

Live website: <https://yourrentalhome.netlify.app>

Github: <https://github.com/bibekbistey/Online-Rental-Frontend.git>

React Projects I created To-do app, Quiz App, Shopping Cart and CRUD operation. Used contextAPI for state management

Github: <https://github.com/bibekbistey/React-Projects>

Python Project

Flappy bird: I created flappy bird game using python as my college project

Github: <https://github.com/bibekbistey/FlappyBird.git>

Car Arcade: This was a group project. This game displays current score, highest score of the player. My specific role focused on developing the database functionality for the project.

Github: <https://github.com/bibekbistey/CarArcade.git>

Mern Project

Doctor Appointment booking: I created doctor appointment booking fullstack web app. The features of this web app includes: User can book the appointment with doctor, users can apply for doctor, Admin can approve doctor request, admin can delete user, Doctor can approve appointment request and they also receives notification.

Github: <https://github.com/bibekbistey/DoctorAppointmentBooking-Frontend>

<https://github.com/bibekbistey/DoctorAppointmentBooking-Backend>

Flutter project

Doctor Appointment booking: I created doctor appointment booking fullstack mobile app. The features of this web app includes: User can book the appointment with doctor, users can apply for doctor, Admin can approve doctor request, admin can delete user, Doctor can approve appointment request and they also receives notification.

Github: <https://github.com/bibekbistey/DoctorAppointmentBooking-MobileApp>
